GENERAL INDEX[1]

A

A.A.A.S., Council representation, 861
exhibition, 861
ABRAMSON, H. A., Electrokinetic phenomena, 698
Absorption and root respiration, relation between, 283
of ash constituents, effects of potassium, 399
of nitrate by the young wheat plant, influence of shorter light rays, 127
spectra of alpha and beta carotenes and leaf xanthophyll at room and liquid nitrogen temperatures, 179
spectra, quantitative, of common carotenoids, 693
Accumulation of petroleum spray oils in leaves, twigs, and fruit of citrus trees, 699
Acetaldehyde, production of by tomatoes, 359
Acidity, hydration of solute ions in relation to, 107
Acids, amino, relation to carbon dioxide and mycelium production of *Fusarium oxysporum*, 823
Activity, oxidase, effect of high frequency sound waves, 385
Advances, recent, in plant physiology, 397
Aerated and non-aerated culture solutions, anatomical and histological differences between barley roots grown in, 389
Aeration, 521
physiological aspects of effect of continuous soil on plant growth, 567
Agriculture, reshaping, 863
Alcohol, production of by tomatoes, 359
Alkalinity, hydration of solute ions in relation to, 107
Alpha carotene, absorption spectra, 179
Amendment of constitution, 184
Amino forms of nitrogen, sugars, and enzyme activity of sugar cane, effects of potassium, 453
Ammonium assimilation in tomato and apple, 31
nutrition, metabolism of etiolated seedlings as affected by, 351
Amounts of bound and free water in an organic colloid at different degrees of hydration, 143
Amylase studies, 463
Analyses, application of quantitative spectral to binary mixtures of the common carotenoids, 681
Anatomical differences between roots of barley grown in aerated and non-aerated culture solutions, 389
ANDERSON, A. K., Relation of amino acids to carbon dioxide and mycelium production of *Fusarium oxysporum*, 823
ANDREWS, F. M., Nuclear division in *Tradescantia virginiana*, 845
Annual election, 695
Apparatus, 129, 174, 786, 790, 856
bomb for calorimeter, 325
calorimeter, 324
for root respiration, 284
Apple, assimilation of ammonium and nitrate nitrogen, 31
effects of humidity on metabolism, 217
spur phyllotaxy, fruiting, 858
Apples, effect of ethylene, ethylene chlorohydrin, and ultra-violet light on carbohydrate content of stored, 637
Application of calorimetric methods to ecological research, 323
of sodium nitrate, effects on flower and blind wood production, 270
Ascent of sap in plants, mechanisms involved, 856
Ash constituents, effects of potassium upon absorption and migration, 399
Assimilation, nitrogen, and effects of soil pH in tomato, 52
of ammonium and nitrate nitrogen, 31
Award, life membership, 183

B

BALDWIN, H. I., Germination of the red spruce, 491
Barley roots grown in aerated and non-aerated culture solutions, anatomi-

[1] Papers published in Plant Physiology are indexed in *The Agricultural Index*, the H. W. Wilson Co., New York City.

cal and histological differences between, 389
BARNES, CHARLES REID, Botanical Laboratory, 697
BARTON-WRIGHT, E. C., Recent advances in plant physiology, 397
Base element relationships of peas grown in water culture under various light exposures, 301
BEALL, RUTH, The soil as direct source of carbon dioxide for ordinary plants, 237
Beans, soy, 60
soy, relations of germination to temperature and length of incubation time, 1
BENEDICT, H. M., Effect of soft x-rays on germination of wheat seeds, 173
Benzoic acid content of cranberries, relation to keeping quality, 631
Berkeley meeting, 695
Beta carotenes, absorption spectra, 179
Binary mixtures of common carotenoids, application of quantitative spectral analyses, 681
Biochemistry, plant, CATHERINE CASSELS STEELE, 863
plant, W. E. TOTTINGHAM, 698
Blight, pahala, 427
Blind wood in roses, causes, 261
Bluegrass, Kentucky, responses to variations in temperature, light, cutting, and fertilizing, 83
Boston meeting, 183
Botanical Congress, Sixth International, 185, 862
laboratory, CHARLES REID BARNES, 697
Botany, progress of, FRITZ VON WETTSTEIN, 398
Bound and free water in an organic colloid at different degrees of hydration, 143
Breeding, horticultural plant, 864
British economic grasses, SIDNEY BURR and DOROTHY M. TURNER, 186
BRYANT, A. E., Comparison of anatomical and histological differences between roots of barley grown in aerated and non-aerated culture solutions, 389
Budding experiments, 269
Buffer, transpiration as a temperature, 167
BULLER, A. H. R., Researches on fungi, 398
BURK, DEAN, Preparation of humate iron and other humate metals, 663
BURKHART, LELAND, Metabolism of etiolated seedlings as affected by ammonium nutrition, 351
BURNS, G. R., Long and short wavelength limits of photosynthesis, 645
BURR, SIDNEY, British economic grasses, 186

C

Calorimetric methods, application to ecological research, 323
Cane, sugar, effects of potassium upon amounts of protein and amino forms of nitrogen, sugars, and enzyme activity, 453
sugar, effects of potassium upon growth, 399
Carbohydrate, and nitrogen relations in wheat plants with reference to type of growth under different environmental conditions, 533
content of stored apples, effect of ethylene, ethylene chlorohydrin, and ultra-violet light, 637
metabolism, 474
-nitrogen and base element relationships of peas grown in water culture under various light exposures, 301
nitrogen ratios with respect to sexual expression of hemp, 731
Carbon dioxide, content of the gas from pea pods, 339
dioxide effects, 846
dioxide, relation of amino acids to, and mycelium production of *Fusarium oxysporum*, 823
dioxide, soil as direct source of for ordinary plants, 237
Carotenes, alpha and beta, absorption spectra, 179
Carotenoids, 862
common, application of quantitative spectral analyses to binary mixtures, 681

for research, 697
quantitative absorption spectra, 693
Carrots, chemical changes in during growth, 671
Cells, mammalian red, 864
Cellular respiration, 862
Chamber, climatic, 129
Chemical methods, 696
methods committee, 397
Chemist, organic, what he can do for plant physiology, 685
Chlorococcum, pure culture grown in darkness, and production of vitamins, 807
Chloroform effects, 848
Chlorophyll, for research, 697
production under various environmental conditions, 59
CHRISTENSEN, R. J., Effect of high frequency sound waves on oxidase activity, 385
CHRYSLER, HELEN L., Amounts of bound and free water in an organic colloid at different degrees of hydration, 143
Citrus trees, penetration and accumulation of petroleum spray oils in leaves, twigs, and fruit, 699
CLAGUE, J. A., Relation of benzoic acid content and other constituents of cranberries to keeping quality, 631
CLARK, H. E., Preparation of aqueous extracts of soluble nitrogen from plant tissues, 817
CLEMENTS, F. E., Effect of soil temperature on transpiration in *Helianthus annuus*, 619
Factors in elongation and expansion under reduced light intensity, 767
CLEMENTS, H. F., Significance of transpiration, 165
Climatic chamber, 129
Clover seedlings, sweet, 43
Cohesion theory, and evaporation in its thermodynamic relation, 653
theory of transpiration, 783
COLBY, H. L., A note on fruiting apple spur phyllotaxy, 858
Colloidal and non-colloidal nitrogen, differences, 275
Colloid, bound and free water in an organic, 143
Committee, chemical methods, 397
life membership, 861
program, 396
STEPHEN HALES prize, 397
Comparison, of anatomical and histological differences between roots of barley grown in aerated and non-aerated culture solutions, 389
of heating and freezing methods of killing plant material for cryoscopic determinations, 369
Composition, gradient, of rose shoots from tip to base, 157
Concentration, hydrogen-ion, of culture solutions, 204
Conducting system, movement of spray oil, 710
Congress, Sixth International Botanical, 185, 862
Constitution, amendment, 184
plant, F MERKENSCHLAGER and M. KLINKOWSKI, 186
Content of the gas from pea pods, carbon dioxide, 339
Corn, losses to the crop caused by leaf injury, 749
Cotton plants, 43
Council representation, A.A.A.S., 861
Cranberries, relations of benzoic acid content and other constituents to keeping quality, 631
Cresoap emulsions of petroleum oils, freezing phenomena, 795
Cryoscopic determinations, comparison of heating and freezing methods of killing plant material, 369
Cucurbita pepo, 353
Culture, pure, of *Chlorococcum* grown in darkness and production of vitamins, 807
solutions, barley roots grown in aerated and non-aerated, 389
water, carbohydrate-nitrogen and base element relationships of peas grown in, 301
Cutting, responses of Kentucky bluegrass to variations in, 83

D

Darkness, pure culture of *Chlorococcum* grown in, and production of vitamins, 807

DAVIDSON, O. W., Preparation of aqueous extracts of soluble nitrogen from plant tissues, 817
DAVIS, ELIZABETH E., Influence of thyroxin on growth of plants, 377
Deficiency, symptoms of potassium, 399
Degrees of hydration, bound and free water in an organic colloid at different, 143
Determinations, comparison of heating and freezing methods of killing plant material for cryoscopic, 369
DEXTER, S. T., Respiratory rate and enzyme activity as related to hardened condition of plants, 831
Salt concentration and reversibility of ice-formation as related to hardiness of winter wheat, 601
Diastase, 175
DICKSON, A. D., Carbohydrate and nitrogen relations in wheat plants with reference to type of growth under different environmental conditions, 533
Differences, anatomical and histological, between roots of barley grown in aerated and non-aerated culture solutions, 389
Dioxide, carbon, content of the gas from pea pods, 339
Directory, 696
Distribution of inorganic solutes, 168
Diurnal changes in carbon dioxide content of pea pods, 342
Division, nuclear, in *Tradescantia virginiana*, 845
DONEEN, L. D., Methods for the preparation of green plant material for the extraction of juices, 839
Drying oven with constant uniform temperature and forced ventilation, 689
DUNGAN, G. H., Losses to the corn crop caused by leaf injury, 749
DUSTMAN, R. B., Effect of ethylene, ethylene chlorohydrin, and ultra-violet light on carbohydrate content of stored apples, 637

E

Ecological research, application of calorimetric methods to, 323
Economic grasses, British, SIDNEY BURR and DOROTHY M. TURNER, 186
EDWARDS, T. I., Relations of germinating soy beans to temperature and length of incubation time, 1
Effect of high frequency sound waves on oxidase activity, 385
Effects of pH, elaboration of nitrogen fraction on, 51
Election, annual, 695
Electrodialysis, extraction of plant tissue by, 33
Electrokinetic phenomena, H. A. ABRAMSON, 698
Element, base, relationships of peas grown in water culture under various light exposures, 301
Elongation under reduced light intensity, 767
EMMART, KATHRYN, Relation of certain amino acids to carbon dioxide and mycelium production of *Fusarium oxysporum*, 823
Emulsions, cresoap, of petroleum oils, freezing phenomena, 795
Endowments, 696
England, New, section, 184
Environment and chlorophyll production, 59
Environmental conditions, carbohydrate and nitrogen relations in wheat plants, 533
Enzyme activity as related to hardened condition of plants, 831
activity, effects of potassium upon amounts of protein and amino forms, 453
Ereptase studies, 468
Errata, v
Ether effects, 848
Ethylene chlorohydrin, effect on carbohydrate content of stored apples, 637
Etiolated seedlings, metabolism of as affected by ammonium nutrition, 351
Evaporation in its thermodynamic relation to cohesion theory and to imbibitional and osmotic pressures of cell constituents, 653
Excised tomato root tips, growth in liquid medium, 585

Expansion under reduced light intensity, 767
Exposure, light, carbohydrate-nitrogen and base element relationships of peas grown in water culture under various, 301
Extraction, of chlorophyll, 61
of juices, method for preparation of green plant material for, 839
of plant tissues by chemical methods, 33
Extracts of soluble nitrogen from plant tissues, preparation of aqueous, 817
EZEKIEL, W. N., Nutritional requirements of the root rot fungus, *Phymatotrichum omnivorum*, 187

F

Factors, limiting, 136
FELLERS, C. R., Relation of benzoic acid content and other constituents of cranberries to keeping quality, 631
Fertilizing, responses of Kentucky bluegrass to variations in, 83
FLINT, L. H., Hydration of solute ions in relation to acidity, alkalinity, and pH, 107
Fluorescein effects, 849
Forced ventilation, a drying oven with, 689
Free water in an organic colloid at different degrees of hydration, 143
Freezing, and heating methods of killing plant material for cryoscopic determinations, 369
influence on carbon dioxide content of pea pods, 346
phenomena in cresoap emulsions of petroleum oils, 795
Frequency sound waves, high, effect on oxidase activity, 385
Fruiting apple spur phyllotaxy, 858
Fruit of citrus trees, penetration and accumulation of petroleum sprays oils, 699
FUDGE, J. F., Nutritional requirements of the root rot fungus, *Phymatotrichum omnivorum*, 187
Fungi, researches on, A. H. R. BULLER, 398
Fungus, nutritional requirements of the root rot, 187
Fusarium oxysporum, relation of amino acids to mycelium production, 823

G

Gas from pea pods, carbon dioxide content, 339
Germinating soy beans, relation to temperature and length of incubation time, 1
Germination, of red spruce, 491
of wheat seeds, effect of soft x-rays, 173
Ginkgo biloba, lateral water transfer, 387
Gradient composition of rose shoots from tip to base, 157
Grafting experiments, 267
Grasses, British economic, SIDNEY BURR and DOROTHY M. TURNER, 186
GREEN, E. L., Gradient composition of rose shoots from tip to base, 157
Growth, associated with changes in composition of gas of pea pods, 342
chemical changes in carrots during, 671
habits of rose shoots, 263
of excised tomato root tips in liquid medium, 585
of plants, influence of thyroxin on, 377
of sugar cane, effects of potassium upon, 399
of wheat under different environmental conditions, 533
physiological aspects of effect of continuous soil aeration, 567
-promotion substances, possible accessory, 207
transpiration and speed of, 168
GUNDERSON, M. F., Production of vitamins by a pure culture of *Chlorococcum* grown in darkness on a synthetic medium, 807
GUSTAFSON, F. G., Production of alcohol and acetaldehyde by tomatoes, 359

H

HABERLANDT, GOTTLIEB, 851
Habits, growth, of rose shoots, 263

Hail, injury, 749
HALES, prize committee, STEPHEN, 397
Hardened condition of plants as related to respiratory rate and enzyme activity, 831
Hardiness of winter wheat and relation of salt concentration and reversibility of ice-formation, 601
HARRISON, C. M., Responses of Kentucky bluegrass to variations in temperature, light, cutting, and fertilizing, 83
HARTT, CONSTANCE E., Some effects of potassium upon growth of sugar cane and upon absorption and migration of ash constituents, 399
Some effects of potassium upon amounts of protein and amino forms of nitrogen, sugars, and enzyme activity of sugar cane, 453
Heating and freezing methods of killing plant material for cryoscopic determinations, 369
Helianthus annuus, effect of soil temperature on transpiration, 619
Hemp, sexual expression of with respect to carbohydrate-nitrogen ratios, 731
HENDERSON, LETA, Relation between root respiration and absorption, 283
High frequency sound waves, effect on oxidase activity, 385
H ion of nutrient solution, 45
Histological differences between roots of barley grown in aerated and non-aerated culture solutions, 389
HOMAN, CLYDE, Evaporation in its thermodynamic relation to the cohesion theory and to imbibitional and osmotic pressures of cell constituents, 653
HOOVER, S. R., Preparation of humate iron and other humate metals, 663
HORNER, C. K., Preparation of humate iron and other humate metals, 663
HUBBELL, D. S., Causes of blind wood in roses, 261
Humate iron, preparation of, 663
Humidity, effects on metabolism in tomato and apple, 217
HUNGATE, R. E., Cohesion theory of transpiration, 783
HURD-KARRER, ANNIE M., Carbohydrate and nitrogen relations in wheat plants with reference to type of growth under different environmental conditions, 533
Hydration, bound and free water in an organic colloid at different degrees of, 143
of solute ions in relation to acidity, alkalinity, and pH, 107
Hydrogen ion concentration, 453
ion concentration and germination, 522
ion concentration of culture solutions, 204
ion concentration of drainage, 426

I

Ice-formation, salt concentration and reversibility of as related to hardiness of winter wheat, 601
Illumination, effect on blind and flowering shoot production, 272
Imbibitional pressures of cell constituents and evaporation in its thermodynamic relation, 653
Incubation time, relations of germinating soy beans to length, 1
Influence of thyroxin on growth of plants, 377
Injury, losses to corn crop caused by, 749
Intensity of supplementary light, 555
International Botanical Congress, Sixth, 185, 862
Invertase studies, 458
Iodine effects, 849
Ions, hydration of solute in relation to acidity, alkalinity, and pH, 107
Iron, effect on chlorophyll production in corn, 73
humate, preparation, 663
toxicity, 441

J

Juice extraction, method for preparation of green plant material for, 839

K

KAPPERT, H., Grundriss der gärtnerischen Pflanzenzüchtung, 864

Keeping quality, relation of benzoic acid content and other constituents of cranberries, 631
Kentucky bluegrass, responses to variations in temperature, light, cutting, and fertilizing, 83
KERSTEN, H., Effect of soft x-rays on germination of wheat seeds, 173
KERTESZ, Z. I., Carbon dioxide content of the gas from pea pods, 339
Killing plant material for cryoscopic determinations, comparison of heating and freezing methods, 369
KLINKOWSKI, M., Pflanzliche Konstitutionslehre, 186

Purdue, 396
Seedlings, etiolated, metabolism of as affected by ammonium nutrition, 351
Seeds, tolerance of liquid-air temperatures by, 392
wheat, effect of soft x-rays on germination, 173
Sexual expression of hemp and carbohydrate-nitrogen ratios, 731
SHIVE, J. W., Preparation of aqueous extracts of soluble nitrogen from plant tissues, 817
Shoots, rose, gradient composition of, 157
SHULL, C. A., Evaporation in its thermodynamic relation to the cohesion theory and to imbibitional and osmotic pressures of cell constituents, 653
Lateral water transfer in leaves of *Ginkgo biloba*, 387
Sixth International Botanical Congress, 185, 862
SKINNER, C. E., Production of vitamins

by a pure culture of *Chlorococcum* grown in darkness on a synthetic medium, 807
Sodium: can it replace potassium, 443
nitrate applications, effects on flower and blind wood production, 270
Soil, as direct source of carbon dioxide for ordinary plants, 237
pH, effects on assimilation of ammonium and nitrate nitrogen in tomato, 52
reaction, 556
temperature, effect on transpiration in *Helianthus annuus*, 619
Solids in watermelon, soluble, 181
Soluble solids in watermelon, 181
Solute ions in relation to acidity, alkalinity, and pH, hydration of, 107
Solutes, transpiration and distribution of inorganic, 168
Solutions, barley roots grown in aerated and non-aerated culture, 389
Sound waves, effect of high frequency on oxidase activity, 385
Source of carbon dioxide for ordinary plants, the soil as direct, 237
Soy beans, 60, 574
beans, germinating, relations to temperature and length of incubation time, 1
Spectra, absorption, of alpha and beta carotenes, 179
quantitative absorption of common carotenoids, 693
Spectral analyses, application of quantitative, to binary mixtures of the common carotenoids, 681
Spray oils, petroleum, penetration and accumulation in leaves, twigs, and fruit of citrus trees, 699
Spruce, red, germination, 491
Staling products, preliminary test for, 205
STEELE, CATHERINE CASSELS, An introduction to plant biochemistry, 863
STEPHEN HALES prize committee, 397
STEPHENS, H. L., Influence of shorter light rays upon absorption of nitrate by the young wheat plant, 127
